

KfW at the 2026 UN-Climate Change Conference COP31 in Antalya

Thematic focus, positioning and planned activities

As of 09.10.26

Thematic priorities of KfW

Markets and financing

Innovation and targeted funding create markets for climate-friendly technologies and for the implementation of climate targets.

Sustainable growth

Linking climate action and resilience boosts competitiveness and supports sustainable transformation.

Clean energy and low-emission industry

Create the conditions for sustainable production and generate new demand for technologies and supply chains.

KfW as a bank of responsibility...

...promotes **German and European interests** at a global level. With a total **financing volume abroad** of almost EUR 30 billion (in 2025).

...remains a **driving force in climate action** – around EUR 415 billion commitments for environmental and climate finance since 2017. Of this, around EUR 100 billion is by its international divisions KfW IPEX-Bank, DEG and KfW Development Bank.

...shows itself to be a **reliable financing partner** – around EUR 50 billion in commitments in the environment/ climate sector in 2026 expected.

...intensifies relations with **long-standing partner country Turkey** – financing amounts up to EUR 1,5 billion expected in 2026.

...finances and plans **projects in Turkey with a climate impact** – around EUR 2 billion in the years 2023 - 2026.

...strengthens **international partnerships and market relations** as a reliable partner.

...supports Germany's **security policy, energy and raw materials security**.
